BEST VALUE PACKAGE

Receive an additional manual and CD package of this program for only \$69 with your seminar attendance!

Value stream mapping is a visualization tool that helps to visualize, understand and streamline work processes using the tools and techniques of lean manufacturing. Value stream mapping and other mapping techniques put a spotlight on waste, streamline work processes, promote deep understanding and build consensus for improvement.

Most business organizations are enormously complex. Only visuals convey enough information to understand the pieces, relationships, hidden waste and time-domain behavior. Mapping for visualization promotes a deep understanding and brings major breakthroughs in productivity and performance. It leads to consensus on systemic problems and remedies. While finished maps communicate information about a situation, the real value is the mapping itself. This is where insights grow, paradigms shift and consensus builds.

AUDIO CONFERENCE AGENDA

What Is Mapping All About?

- Types of Maps
- Value and Waste
- Background of Mapping

Value Stream Maps

- What Is a Value Stream?
- Product Families
- Elements of Lean Manufacturing
- Value Stream Symbology
- Lean Principles and Techniques

VSM Procedures

- How to Map the Present State
- Seven Steps to the Future

Teamwork - the Key to Success

- Mapping Teams
- Facilitation Technique
- The Columbo Approach
- Brainstorming

Using Your Maps

- Mapping and Strategy
- A Mental Model
- Implementation Planning
- The Limits of Mapping
- Other Mapping Techniques

“The ability to learn faster than your competitors may be the only sustainable competitive advantage.”

— Arie de Geus

Value Stream Mapping

LIVE AUDIO CONFERENCE

June 12, 2013 • 1:00 pm – 2:30 pm EST

Meet The Presenter:

Quarterman Lee

Strategos, Inc.

- Trusted advisor to clients across many industries and in many countries for more than 30 years
- Has been a plant manager, maintenance superintendant and design engineer
- Earlier employment included Ford Motor Company, Boeing, Crown-Zellerbach and Atchison Casting
- As maintenance superintendant for a large steel foundry, he introduced reliability concepts and other elements of what is now called total productive maintenance bringing order-of-magnitude reductions in downtime and enabled the foundry to expand output
- Lean manufacturing and TPM have become a major thrust of his professional efforts
- Also designed structures and mechanisms for the F4 Phantom, industrial electric and ventilation systems, specialized machinery and a patented commercial dishwasher
- Member of the Institute of Industrial Engineers, the Society of Manufacturing Engineers and the APICS
- Wrote or co-wrote five books, hundreds of professional articles and several dozen training programs
- B.S. degree in mechanical engineering, Purdue University
- Can be contacted at qlee@strategosinc.com

Continuing Education Credit

- CPIM/CFPIM/CSCP 1.0
- CPE 1.5
- ISM 1.50
- PMI 1.50

For detailed credit information visit us at www.lorman.com/ID392085 or contact us at 866-352-9540.

*Visit www.lorman.com/ID392085 for a complete list of states approved.

Who Will Be There?

This live audio conference is designed for operations managers, engineers, presidents, vice presidents, owners, supervisors, manufacturing engineers, project managers, plant and facility managers, operators and technicians, quality control personnel, controllers, inventory specialists and design professionals.
