KUKA.DeviceConnector pre-installed 2.1

SKU do produto: 337682

The KUKA.DeviceConnector pre-installed 2.1 option package installs an OPC UA interface and an MQTT interface on the robot controller. These interfaces enable the robot to communicate with KUKA Cloud services.

- KUKA.DeviceConnector pre-installed 2.1 provides a predefined set of robot data and sends these data to the cloud via the OPC UA interface.
- The robot controller can connect to the cloud via the MQTT interface and access the data.

On newly delivered robot controllers, KUKA.DeviceConnector pre-installed 2.1 is pre-installed as standard. In the case of older robot controllers, KUKA.DeviceConnector pre-installed 2.1 can be installed subsequently.
