Uptime and Efficiency of Robots is **Ess**ential in Profitable Robot-based Automation

KUKA.iiQoT Jump Start Initiative | Digital Services | June 2022 | www.kuka.com

Seite: 4

Our Experience for Robot-Automated Shopfloor

-1 Maintenance event

Up to **5h p.a.**^{1,2}

Prevent downtime before or when it happens

Up to 20h p.a.1

All robot information on one spot & up-to-date

Up to 1h p.a.1

"3-click" KRCDiag transfer to KUKA

Up to 0,5h p.a.1

Up to 25h p.a.^{1,2} production savings

Up to 1,5h p.a.¹ employee savings

All with cost-free KUKA iiQoT.Basic

-Versus-

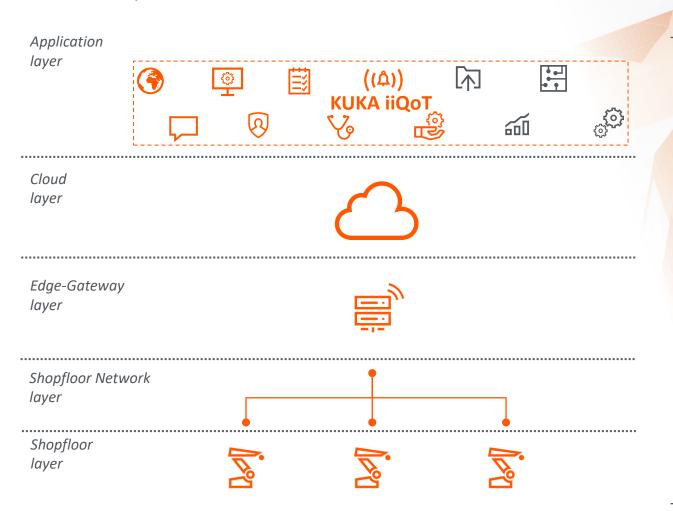

Average customer one-time effort of 8h 3

¹ Based on KUKA production hall; Augsburg Germany - 6 robots; 255 days; three shifts

² Based on average maintenance duration of all robot maintenance events

³ Based on assumption that prerequisites are given (checklist available)

KUKA iiQoT Product Architecture

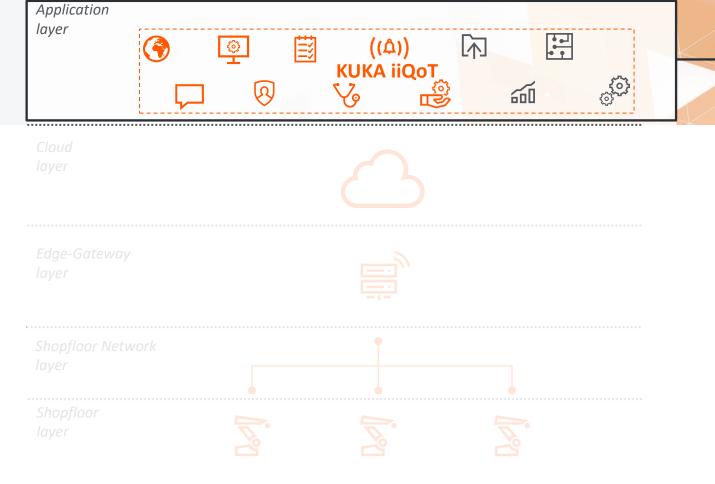

Simplified visualization of necessary layers to connect physical production assets with a cloud solution

→ KUKA Robots with KUKA iiQoT

KUKA iiQoT Cloud Options

Cloud Option I Option II layer **Public Cloud** Private Cloud¹ Hosted by **KUKA** Hosted by Customer

KUKA recommendation

- Fastest usage
- Smallest effort

Option I

Public Cloud

- Managed cloud by KUKA
- Latest product developments & IT security standards
- Smallest involvement/effort by customer

Option II

Private Cloud

- Managed cloud by customer incl. hosting costs
- Cloud adjustments required to enable all functions
- Involvement/effort required by customer (project)

General

Cloud Server Notes

- All options come with KUKA iiQoT Broker Software
- All options come with commissioning manuals
- Customers task to set up required IT infrastructure

KUKA recommendation • Full KUKA support

KUKA iiQoT Edge Gateway Options

hopfloor Network ayer

KUKA Product

• 2 Services in one

KUKA CRSM Type A

- Licensed KUKA Product
- Performs KUKA iiQoT and KUKA Remote Service
- Meets IT security standards with integrated Firewall

Option II

Option I

Virtual Cloud Connector

- Cost-free Product
- Performs KUKA iiQoT vitually
- Customer provides server with integrated Firewall

Option III

Welotec EG 500

- KUKA recommended Edge-Gateway (not sold by KUKA)
- Performs KUKA iiQoT (Remote Support requires add. Hardware)
- Customers task to procure Welotec EG 500

Customer Notes

- All options come with KUKA iiQoT Broker Software
- All options come with commissioning manuals
- Customers task to set up required IT infrastructure

KUKA iiQoT Shopfloor Network

General

Customer Notes

- Network connection between robots and edge-gateway
- KUKA offers a Shopfloor Network checklist
- Customers task to set up required IT infrastructure

Snopjiooi layer

KUKA iiQoT Shopfloor Requirements

General

Customer Notes

- Each robot needs KUKA.DeviceConnector pre-installed
- Free KUKA software (Download on KUKA Marketplace)
- KUKA iiQoT works with OS KSS 8.3 or higher

KUKA iiQoT Data Security

KUKA Cloud Security

- ISO 27001 certified data center located in the European Union
- Latest MS Azure cloud security and compliance standards
- Newest encrypted data traffic
- Edge authentication via TPM¹ (industry-wide ISO standard)

Data Storage Rules

- Only KUKA robot variables
- Strict GDPR compliance

Objective of Data Collection

- Solely purpose of robot system
- Improvement of KUKA products & services

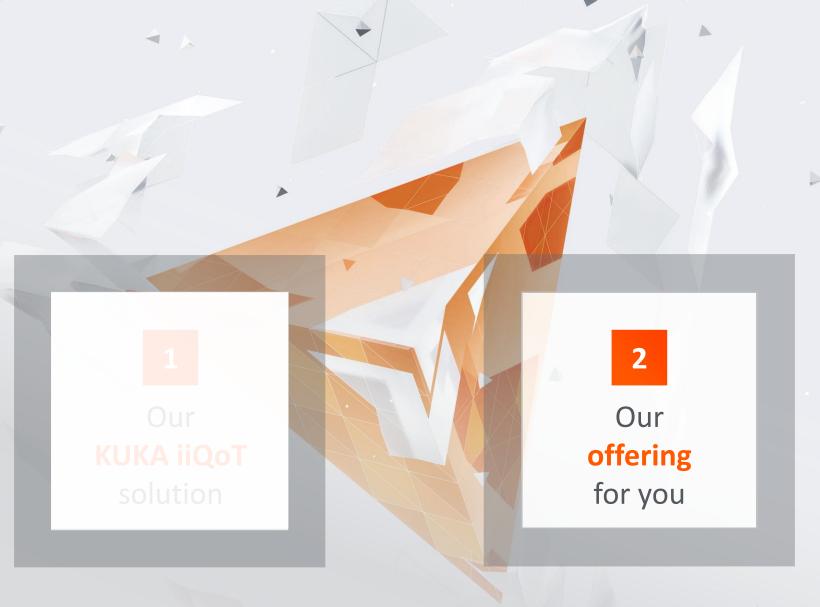

KUKA Data Assurance

- No back trace of user or production quality
- No sharing to 3rd parties
- No value for external parties

Agenda

The Jump Start Initiative Covers all Customer Challenges to use KUKA.iiQoT

Content

Provide all necessary items for efficient implementation

Close technical support to solve all obstacles to use KUKA.iiQoT

Official KUKA solution with continuous development

KUKA.iiQoT Jump Start Initiative | Digital Services | June 2022 | www.kuka.com

Jump Start Initiative in a Nutshell

KUKA offers an <u>all-inclusive</u> approach to enable the digital transformation of KUKA Robots with iiQoT

What is in for you?

- Immediate tenant
- Easy access to required hardware¹
- Direct access to iiQoT experts

Until End of 2022

Timely-limited offer²

How to qualify?

- Start of IIoT project in 2022
- Provide employee for iiQoT commissioning
- Agree to feedback interviews (product & commissioning)

¹ Limited number of rental devices – first come first serve

² Offer is active if customer agrees to contract iiQoT Jump Start and starts implementation in 2022

Who is our target group for KUKA.iiQoT – Jump Start?

High intention of executing/starting IIoT project in 2022

Dedicated contact person for IIoT implementation

Interest in free iiQoT connection consulting

KUKA Operating System (V)KSS 8.3 or higher

Agree to product & commissioning feedback loop

Customer executes robot maintenance and/or optimization

- KUKA.iiQoT is for all industries
- Only participants of Jump Start initiative are entitled for free iiQoT connection consulting (deadline 31st of December 2022)

All Components necessary for KUKA.iiQoT and Jump Start Offering

Product components

KUKA.iiQoT Tenant

Customer IT-Infrastructure

Jump Start Initiative covers all components

Customer Tenant

Included Cloud Gateway

iiQoT Connection Support

Immediate Tenant access

Cloud costs hosted by KUKA

Physical Cloud Gateway¹ Virtual Cloud Gateway²

- Rental -

- Free -

KUKA Consulting Service to ensure connection of KUKA.iiQoT with customer IT-Infrastructure

The Jump Start Initiative Covers all components

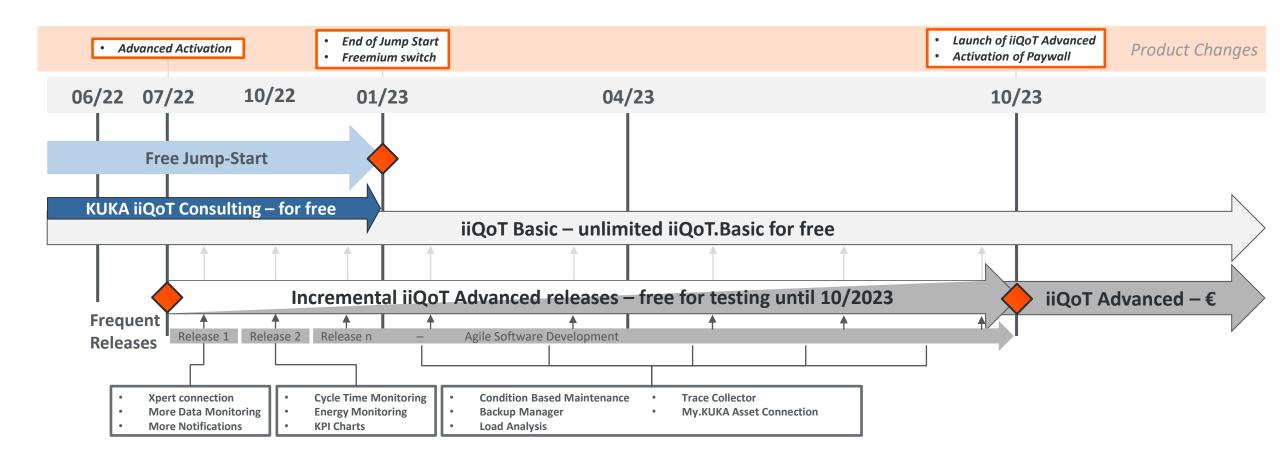

¹ KUKA offers cloud gateway recommendation with corresponding gateway configuration and additional commissioning manual

² Customer must provide server/PC for virtual cloud gateway
